Task 1: Search Engines	3
Task 2: Link Directories	3
Task 3: Article Directories	4
Task 4: Press Release	4
Task 5: “One-Way” Backlinks from Other Websites	6
Task 6: Social Bookmarking sites	6
Task 7: Social Networking Sites	7
Task 8: Get “One-Way” Links from Authority Sites	8
Task 9: Build Communities	9
Task 10: Video Submission	9
Task 11: Blogs	9
Task 12: Forums	9

Task 1: Search Engines

Your website has been successfully submitted to 200 leading search engines.

NOTE: It may take a few weeks for your website to appear in some search engines. Here is the list of 200 top search Engines, where your website has been submitted to.

[The List of Search Engines where the website has been submitted goes here....+

Task 2: Link Directories

Your website, along with the title, description and keywords has been submitted to leading link directories.

As a result, your website positioning should start moving up to the top of the search engine results page, because of the 'back-links' you are getting.

NOTE: It may take several weeks for your links to appear in these Link Directories because they receive hundreds of submissions everyday and each submission is reviewed/moderated before it is approved. Here is the list of 20 Link Directories, where your website has been submitted to.

*List of link directories goes here.....+

Task 3: Article Directories

Search Engine robots love content rich sites like Article Directories. When they come across your article, with a link back to your website, they continue to crawl to your site too. As a result, your search engine positioning should go up.

Other than SE robots, newsletter editors and other webmaster will also be lurking around article directories to pickup content for their publications.

This also helps in getting your website indexed quickly.

Here is the list of article directories where your articles have been submitted.

1. Title of Article 1
[The list of article directories both manual and automated goes here...]
2. Title of Article 2
[The list of article directories both manual and automated goes here...]
3. Title of Article 3
[The list of article directories both manual and automated goes here...]
4. Title of Article 4
[The list of article directories both manual and automated goes here...]

Task 4: Press Release

A compelling Press Release has been submitted to the top press release distribution sites. It is a proven way to attract targeted visitors to your website.

Search Engine robots visit these PR sites several times in a day!

Note: It will take about 1 week to 10 days for the approval. I will also attend to any questions that the editors may ask.

The list of Press Release Distribution sites submitted to is as follows:

Task 5: “One-Way” Backlinks from Other Websites

We have made the special arrangement with the owners of other Blogs and added “POSTS” about your website with a one-way link back to your domain.

These are not just ‘comments’ about existing posts; they are actual Posts (Blog entries) about YOUR website on other people’s Blogs.

Further, these Blogs are on different “C” Class servers with good PR. This results in getting a better ranking and greatly enhances your Search Engine positioning.

Note: You can verify these POSTS in the list of 10 BLOGS with back link to your website <http://www.YourWebsite.com>

[The list of websites where the blurbs have been posted goes here...]

Task 6: Social Bookmarking sites

Social Bookmarking is the new tool that actually works because users rate the entries and popular bookmarks go higher up in the listings. Even before your website is indexed in the search engines, they can come up on Bookmarking sites. This also helps in search engine rankings.

Your website has been posted to the following list of Bookmarking sites:

[The list of bookmarking sites goes here...]

Task 7: Social Networking Sites

It has been proven by many internet marketers that the new trend of people driven websites (like social networking sites) lead to additional traffic and sales.

In order to make full use out of the trend, we have created profiles and made several postings in each of the leading social networking sites.

We have created your profile, configured and added your content (with a link back to your primary website) on leading Web 2.0 sites.

[The list of networking sites along with their login information goes here...]

5. <http://www.Multiply.com>

Username: XXX

Password: XXXX

Task 8: Get “One-Way” Links from Authority Sites

A wiki is a site that you can change. Someone starts a wiki on a topic they like and then allows other people to edit the wiki whenever they like. You could start your own wiki on whatever topic you like.

By contributing to such 'wiki' sites, you can sneak in your website link in the 'External Links' section of stories published over there.

With a little research you should be able to add your content and links. Remember, 'Wiki' sites are usually very high in PR and attract targeted traffic. Further, linking from a 'wiki' site enhances your credibility to a great extent. We have created your profile, configured and added your content (with a link back to your primary website)

[The list of authority sites along with their login information goes here]

Password: XXXX

4. <http://www.WikiSpaces.com>

Username: XXX

Password: XXXX

5. <http://www.Aboutus.org>

Username: XXX

Password: XXXX

Task 9: Build Communities

We have also made use of building communities in all these social networking sites.

By building these communities you will, in a way, get targeted visitors interested in your niche. For example, in MySpace, you can start/join groups and you will be able to broadcast messages to all the group members.

[The list of communities joined will go here]

Task 10: Video Submission

A short video has been created and has been submitted to the following Video Sites:

[Here are the list of video sites where your videos will be posted.]

Task 11: Blogs

By posting blurbs about your website to other people's Blogs you not only get targeted visitors but also back links. This definitely helps in boosting your search engine rankings.

Note: In all these BLOGS third party informative comments have been posted in order to attract more visitors. You can verify these comments in the list of 10 Blogs.

[The list of blogs where the comments have been posted goes here....]

Task 12: Forums

Forums are hot beds of public interaction. By participating on leading forums, you not only get highly targeted traffic but also get those precious back-links.

We found Forums related to your niche, logged in, searched for a relevant post and replied to the post while strategically dropping your website URL for the visitors to see and search engines to crawl.

Note: Suitable comments have been posted as a reply to the topics in order to attract unique visitors. You can verify these in the list of 10 Forums. [The list of forums where the comments have been posted goes here....]

Thank you for your business,

Team Members,
